

BREEDER

B	I	N	G	O
Children are a woman's greatest achievement	It's all worth it	But today's kids are tomorrow's taxpayers	What's the matter with you?	Children are our future
The Bible said "go forth and multiply"	You'll change your mind	What if you're parents had thought like you and not had children?	Who will take care of you when you're old?	It's different when it's your own child
What about the family name?	Your biological clock is ticking	FREE STORK PARKING SPACE	Why bother getting married if you're not going to have children?	Don't you want to pass on your genes?
Nothing is better than that "new baby" smell	Don't you want to see what your kids would look like?	It's the most important job in the world	You'll forget the pain of childbirth as soon as you see the baby	People who don't want children are selfish
What if everyone decided not to have kids? The human race would die out!	You aren't a real adult until you're a parent	What about your parents? Don't they want grandchildren?	You're kid could be the one who eventually cures cancer	But you would make such a great parent
